

# High Capacity Fused Probe Set, CSA Certified

## CT3386CA

### FEATURES:

- Fast Acting Class CC Fuses
- c-CSA-us Certification
- 200,000 A Interrupt Capacity (AC)
- IP2X user protection
- Blown Fuse indicator
- 2mm (.080") tips w/8-32 thd adapters
- 600V CAT III P2 Protection
- Fuse rejection feature
- Sized for easy handling with gloves

### FUSED PROBES PROVIDES THE RECOMMENDED SAFETY WHEN CONDUCTING ELECTRICAL TESTS WITH DIGITAL MULTIMETERS:

In a survey conducted by the Electrical Safety Authority (ESA) of Ontario Canada, 1 in 10 electrical trade users have had a meter fail violently during use. Several leading causes were test leads in the incorrect jacks, selector switches on the wrong setting, and voltages above the meter's rating. Among their recommendations:

- Use the right meter...
- Use the meter right...
- And always use Fused Leads!

Cal Test's Model CT3386CA High Capacity Fused Probes provides that recommended level of user safety and more, including CSA Certification. Others supply fused test leads, but only Cal Test's CT3386CA probes provide - an industry-high - 200k A (AC) interrupt rated Class CC ceramic fuse with along with 600V CAT III P2 voltage protection per IEC61010-031. Sized for easy handling with safety gloves, the probe

set's features include: locking spring-loaded IP2X tip protection shrouds, 2mm (.080") diameter tips for N.A. receptacle testing, 8-32 UNC threads at the base of tips for adapters such as extra-large alligator clips, tamper-proof fuse holders, and unique (ESA recommended) internal blown fuse indicator lights. The indicators will light if fuses are open (blown) or missing. The probes are connected to a DMM through 4mm sheathed banana plugs with 1m long, 1.0 mm<sup>2</sup> (approximately 17AWG) PVC jacketed high-flex test lead wire.

Achieve maximum user protection by following all procedural and meter safety recommendations and by using Model CT3386CA High Capacity Fused Probe Set.

### SPECIFICATIONS:

- Voltage - 600 V CAT III P2
- Interrupt Rating - AC 200,000 A I.R.  
DC 100,000 A I.R.
- Max. Operating temperature - +40° C
- Max. Rated current - 20 A  
(or 10 A fuse Rating)
- Cable length - 1 m (40")
- Safety - c-CSA-us  
Standard C22.2  
No. 61010-1092 & 61010-2-31  
EN61010-031
